

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (previously amended) Integrated circuit comprising a plurality of processing modules (M, S) said modules being disposed on the same chip, and a network (N; RN) arranged for providing at least one connection between a first and at least one second module (M, S),
wherein said modules communicate via a network on chip, and
wherein said connection supports transactions comprising outgoing messages from the first module to the second modules and return messages from the second modules to the first module, the integrated circuit comprising at least one dropping means (DM) for dropping data exchanged by said first and second module (M, S), and
at least one interface means (ANIP, PNIP) for managing the interface between a module (M, S) and the network (N, RN),
wherein said interface means (ANIP, PNIP) comprises a first dropping means (DM) for dropping data, and
wherein the dropping of data and therefore the transaction completion can be controlled by the interface means.
2. (cancelled).
3. (previously amended) Integrated circuit according to claim 1, wherein said network (N, RN) comprises a plurality of network routers for forwarding data without dropping data.
4. (previously amended) Integrated circuit according to claim 3, wherein said dropping means (DM) are adapted to create an error message if data is dropped.
5. (original) Integrated circuit according to claim 4, wherein said dropping means (DM) are adapted to send said error message to a first dropping means (DM).

6. (original) Integrated circuit according to claim 4, wherein said dropping means (DM) are adapted to send said error message to said first module (M).
7. (original) Integrated circuit according to claim 5 or 6, wherein said interface means (ANIP, PNIP) is adapted to store received error messages.
8. (original) Integrated circuit according to claim 7, wherein an interface means (ANIP) associated to the first module (M) is adapted not to drop error messages.
9. (cancelled).
